

## **FUN FACT about GREAT BLUE HERONS!**

Great Blue Herons are the largest wading birds in North America standing nearly 1.5 meters tall, and can have a wingspan of 2 meters! Despite their large size they only weigh an average of 2.5 kg! If you think about it in human terms, herons are as tall as an average 8 year old child but only weigh as much as a new born baby.

To learn more about Great Blue Herons and how your actions can help this vulnerable and declining species, click this link or scan this QR code.
